

Finding and Landing Clients

Clair J. Sullivan

clair@clairsullivan.com

ICE BREAKER

Outline

- 2 key concepts of the course, this module
- The importance of your network
- How to analyze your network
- How to grow your network
- Who is your ideal client?
- On the subject of online freelancing platforms, cold calls/emails
- DISCUSSION

Caveat Emptor:

I am not a lawyer or
an accountant

TWO KEY CONCEPTS FOR THIS COURSE

1. Working for yourself is the one way to guarantee (or minimize the probability) that you will not be laid off
2. Setting up a solopreneur business is easy and landing your first client is easier than getting your next job

TWO KEY CONCEPTS FOR THIS MODULE

1. Your first client will come from within your network. 90%+ of your subsequent clients will as well. So establishing and growing your network in your field is CRITICAL.
2. Using your network effectively is about identifying the key nodes within in and establishing regular, in-depth conversations with them.

QUICK UPDATE:

My recent
conversation with
my accountant

The importance of
your network

My story: my first 5 clients

- Client 1: CEO of a startup, took my online classes with Neo4j and had linked with me on LinkedIn
- Client 2: CEO of a startup, someone I had worked with 20 years ago and our paths crossed a few times over the years with his various companies
- Client 3: CEO of a private company, someone I had worked with 15 years ago and we have just stayed in touch
- Client 4: Director of a defense contractor, someone who worked on the same grant as me 12 years ago
- Client 5: VP of a public company, a referral from someone working at Client 3's company

Some truths about getting clients

- Your first client will come from within your existing network
- So will your second
- And probably your third
- ...
- Good networks include:
 - People you have worked with in the past
 - Other people in your field who know of your experience, skills, and interests
 - People who work for companies that have problems that you can solve
 - Other solopreneurs!
- Even as you grow, 90%+ of your clients will come from within your network

The importance of other solopreneurs in your network

- Other solopreneurs are NOT your competition - they are your colleagues!
- You gain **credibility** with potential clients when you can refer them to other solopreneurs
- Word-of-mouth marketing is *incredibly* important and effective!

How to analyze your network

What do we mean by a network?

Not all nodes in a network are created equal

Where is your network?

- In person?
- Phone?
- Email?
- Social media?
- YouTube?
- Slack / Discord?

Seeking out the influential nodes in your network

- They know a lot of people
- More importantly, the people they know are high quality connections
- They are vocal advocates who know your work and are willing to connect you with others
- They know people who are looking for help who could contract with you
- They have serious skills
 - Credibility

EXERCISE:

Think about your network. Who are the 2-3 most influential nodes?

How to grow your network

CREDIBILITY

DEFINITION

Credibility refers to the trustworthiness and reliability of a source or individual based on their track record, expertise, and transparency. It is a measure of how believable and authentic information or a person appears to others. Establishing credibility often requires consistent honesty, accuracy, and expertise over time.

EXAMPLES

- **Certified Professionals:** Individuals who have undergone rigorous training and examination to prove their expertise in a particular field
- **Eyewitness Testimony:** A firsthand account given by individuals who directly observed an event, providing valuable insights and details about the occurrence.

Credibility must be...

- Public
- Searchable
- Measurable / demonstrable
- Verifiable

Using credibility to enhance your position in the network

- Credibility acts as social proof that amplifies your position in the network
- Quality signals travel through networks faster than weak signals
- Credibility transforms you from a peripheral node to a connector node
 - As people recognize your expertise, they naturally connect with you
 - “I know the person who wrote this article”
- Public demonstrations of expertise create better PageRank
- Credibility becomes searchable and discoverable

Establishing credibility: “The Content Flywheel”

Goal: take one substantial bit of content, break it into microcontent, and cover as much surface area with it as possible

A note on conferences

- Great for networking, especially if you are establishing your credibility at them
 - Speaking
 - Volunteering
- A great way to keep your skills current, continuing education
- What conferences teach X?
- What conferences do Y attend?
- An investment in you!
- Tax deductible! (Caveat Emptor)

Considerations when you are keeping your intent to go solo private

- Only talk with those influential nodes within your network
- When publicly working to establish credibility, try and do it relative to your current work
- Consider starting as a side hustle with a single client rather than a full-in approach

EXERCISE:

If you do “X for Y,” brainstorm 3-5 large content items that could demonstrate your expertise in X, targeting Y, that you could create RIGHT NOW?

Who is your ideal
client?

Important things to consider before identifying

- Consider the “I do X for Y” niche
- Company maturity
 - Pre-funding startup
 - Series ____ startup
 - Public
- Company size
- What the company works on
- Public versus private
- Have they recently had layoffs?

Identifying the problems they have to solve

- Talk with decision makers
- What keeps them up at night?
- Take away a pain or provide a pleasure?
 - One tends to be more common for solopreneurs than the other
- Don't tell them what their problems are
 - ...even if you know they are wrong
 - Guide them to it
- Offer to solve the *problems they identify* for them
 - During the solving process is when you guide them to what the real problems are
 - Results in repeat / continued business!

EXERCISE:

The “Past Success”
analysis

How to do the “Past Success” analysis

1. Identify 3-5 projects or work experiences where you felt the most energized and competent
2. For each of the above identify:
 - a. What type of person or organization did you help?
 - b. What specific problem did you solve?
 - c. What made the collaboration satisfying?
3. Explore what patterns have emerged from the above
4. Who in the market, your niche, and/or your network fits the above?

Create a specific plan to get in front of leaders (director-level and above) of these companies!

MY STORY:

The importance of
client diversity

DISCUSSION:

Describe your ideal
client

Keeping track of them: Customer Relationship Manager (CRM)

- Centralizes data on all customer interactions in one place
 - Contact information
 - Interactions
 - Purchases/contracts
- Manages leads, tracks sales pipelines, automates follow-ups

All Contacts

Navigation

- Simple CRM Dashboard
- Client Funnel
- Prospects
- Current Clients
- All Contacts
- Archive

On the subject of
online freelancing
platforms, cold calls

Online freelancing platforms

- There are many options
 - Upwork
 - Fiverr
 - Toptal
- Landing work here involves lots of tricks that successful freelancers on the platform rarely share
- A race to the bottom
- Tons of “shady” interactions
- Useful for finding help on one-time jobs, specific tasks
 - Tax deductible

TWO KEY CONCEPTS FOR THIS MODULE

1. Your first client will come from within your network. 90%+ of your subsequent clients will as well. So establishing and growing your network in your field is CRITICAL.
2. Using your network effectively is about identifying the key nodes within in and establishing regular, in-depth conversations with them.

To do list

- Identify the influential nodes in your network and get time on their calendar
- Complete the “Past Success” analysis to identify your ideal customer, post in #general
- Create your Content Flywheel plan based on your identified ideal customer
- Schedule your 1:1 coaching session if you haven’t already
- Prepare to launch your business!
 - Any volunteers for the final class to discuss their business?
 - Post your results in the assignment page on Maven

Optional capstone project

- Identify your registered agent
 - Could be you
- Pick a company name
- Register with your state by submitting the Articles of Organization (assuming an LLC)
- Create an EIN number for your business
 - <https://sa.www4.irs.gov/applyein/>
- Open a business banking account (optional for the assignment but *STRONGLY* recommended for running your business!)
